

LYFTA

**Unlock a world of immersive human stories
to broaden student horizons and bring
learning to life**

Students can explore each storyworld, taking in the sights and sounds as they move around the space, unlocking rich media content and getting to know real people through powerful and inspiring short documentary films. The interactive and immersive nature of the platform ensures students are highly engaged and emotionally connected to their learning.

The content and resources are ideal for teaching a range of subjects including literacy, personal social and health education, relationships and sex education, physical education, geography, citizenship, science, religious education, and design & technology in primary, secondary and special schools. The ready-made lesson and assembly plans cover a range of vital themes such as sustainability, wellbeing, human diversity and compassion, and are ideal for nurturing vital skills and values such as empathy, resilience, and critical thinking.

Storyworlds

Lyfta storyworlds come from around the world and feature a range of inspiring real people. Each powerful storyworld has been carefully selected to spark curiosity and empathy.

The Lyfta platform contains 65+ interactive and immersive storyworlds and over 350 lesson and assembly plans for teachers to use and adapt. We have an exciting pipeline of new storyworlds with new content releases each term.

66

Lyfta really has been a lifeline this year- not a bolt-on but a resource to enrich and enliven curriculum. Cannot recommend highly enough

Dan Morrow - CEO, Dartmoor Multi Academy Trust

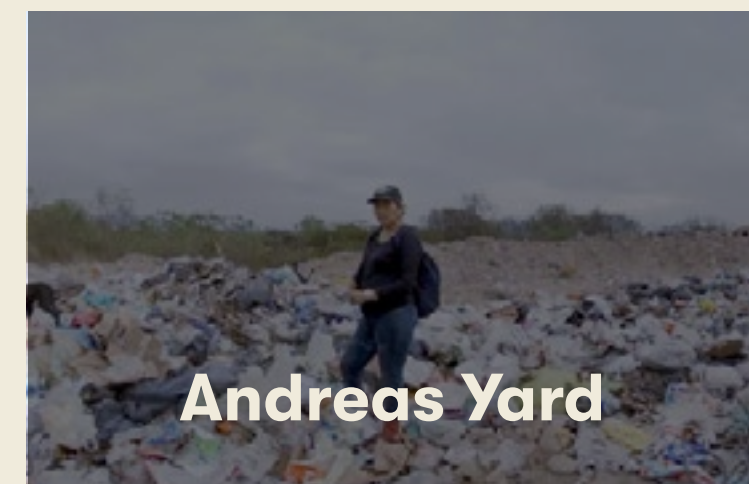

Lyfta has transformed the way that I am able to teach. The children LOVE it and it has sparked some extremely interesting discussions and debates in my classroom.

Dean Lynch - Teacher, Three Bridges Primary

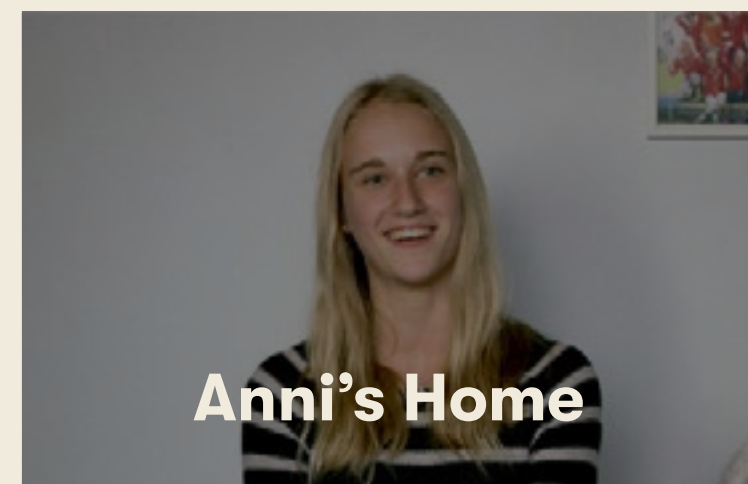

Lyfta has inspired and engaged our children more than I thought possible from a single platform. One of the highlights of my week is running the Lyfta assembly where we all discuss the weeks Lyftatime and I get to hear their thoughts and views.

Michael Brothwood, Djanogly Sherwood Academy

Lyfta Pedagogy

Resilience, empathy and global citizenship education

Lyfta's mission is to nurture resilience, empathy and global citizenship through immersive and interactive learning. We know that our films and resources help spark curiosity and a sense of human connection. Our pedagogical approach is designed to harness this curiosity, and supports teachers to develop the critical thinking skills in their students that are required to thrive in and improve our increasingly uncertain world.

Our pedagogy is informed and influenced by the broad fields of critical global citizenship education, sociocultural learning theory and transformative learning theory.

Many of the resources were initially developed in Finland where the national curriculum has sustainable wellbeing as one of its core guiding principles – alongside equity and equality; inclusivity; high quality teaching and teachers’ pedagogical autonomy; and focus on learners and learning.

Active citizenship & building sustainable future

Teacher interface

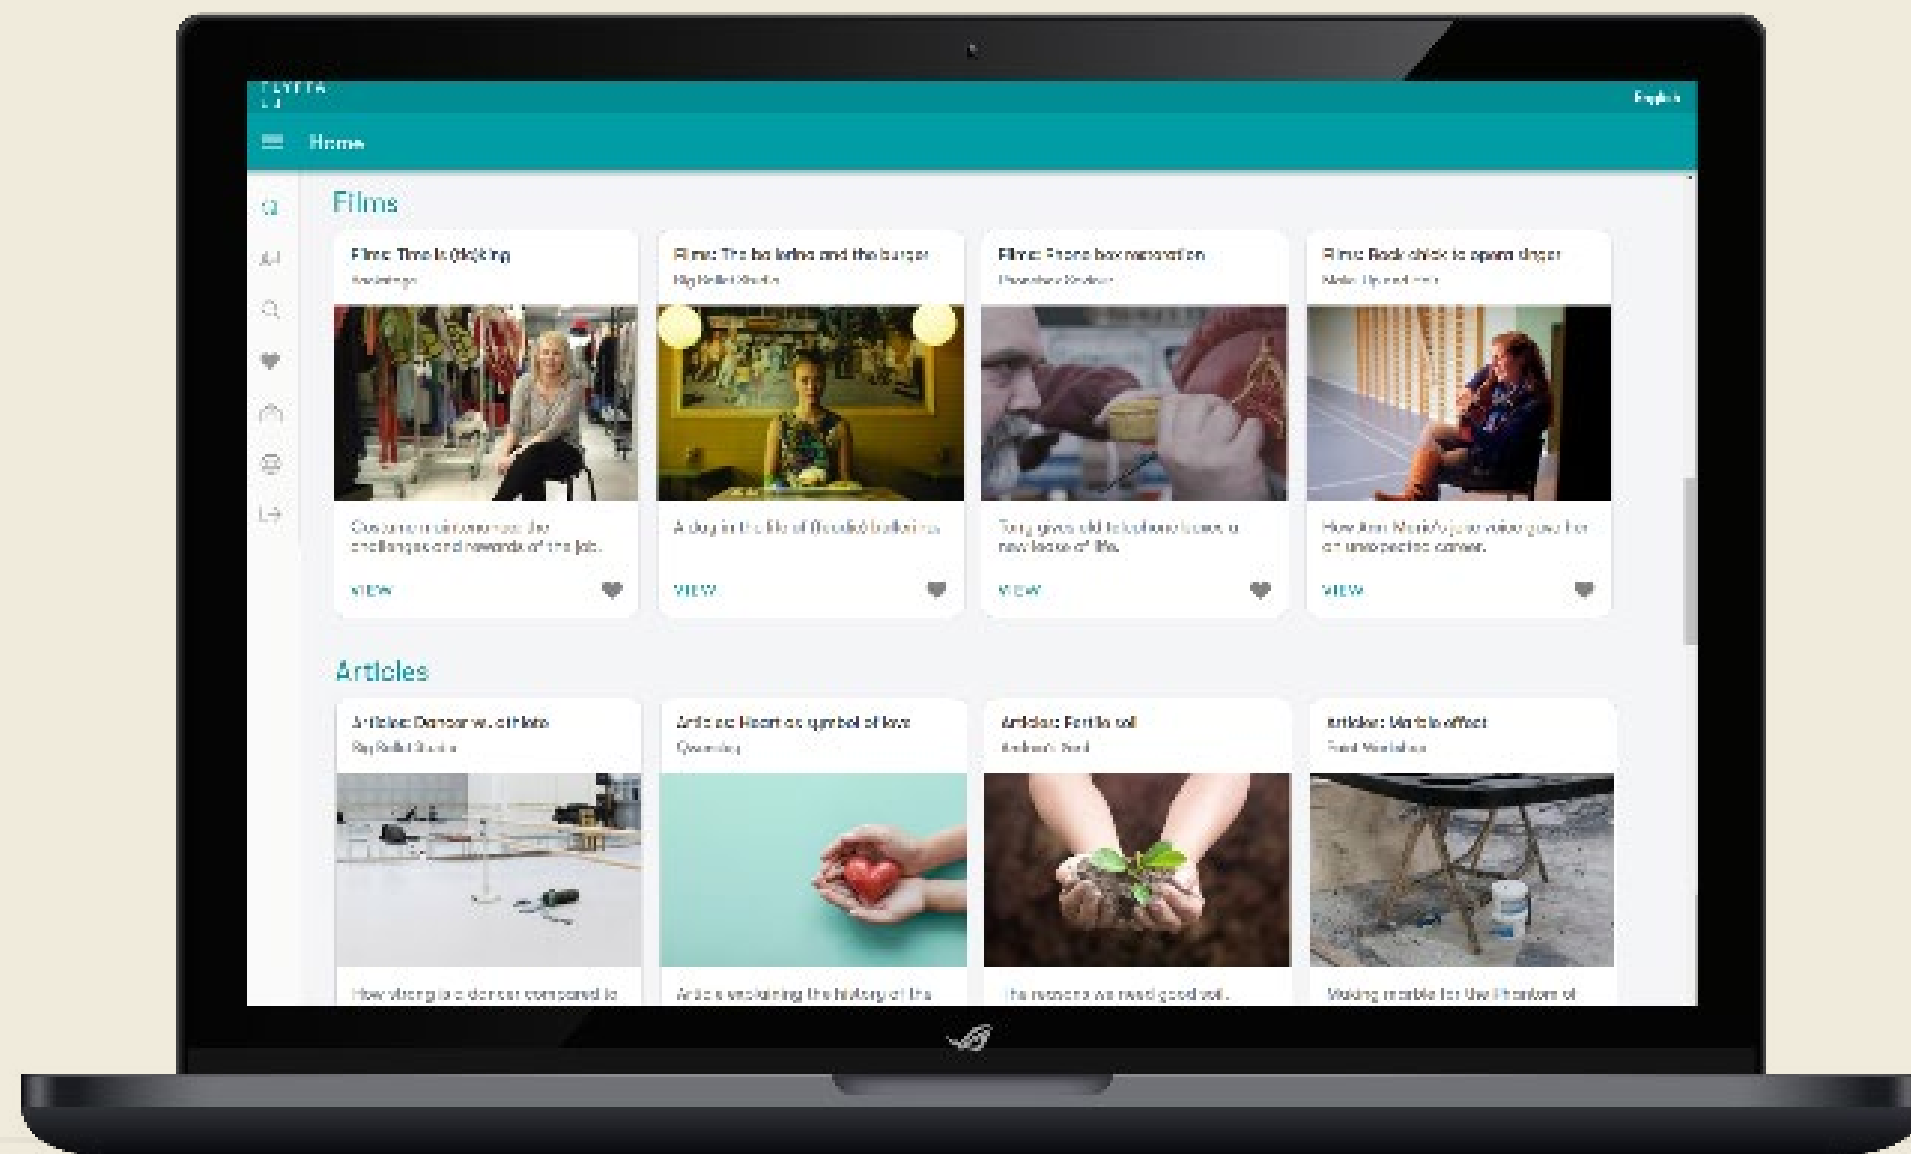

The intuitive teacher interface makes it quick and easy for teachers to plan and deliver lessons and assemblies across a number of topics, both face to face and remotely.

Content is categorised and searchable by core themes, key skills and values, including resilience, empathy, critical thinking and perspective taking, and also by the 17 UN Sustainable Development Goals, enabling teachers to plan, build and deliver lessons across a range of topics.

The platform contains over 350 example lesson and assembly plans developed by our expert education team and which are linked in the teacher notes to national curriculum objectives.

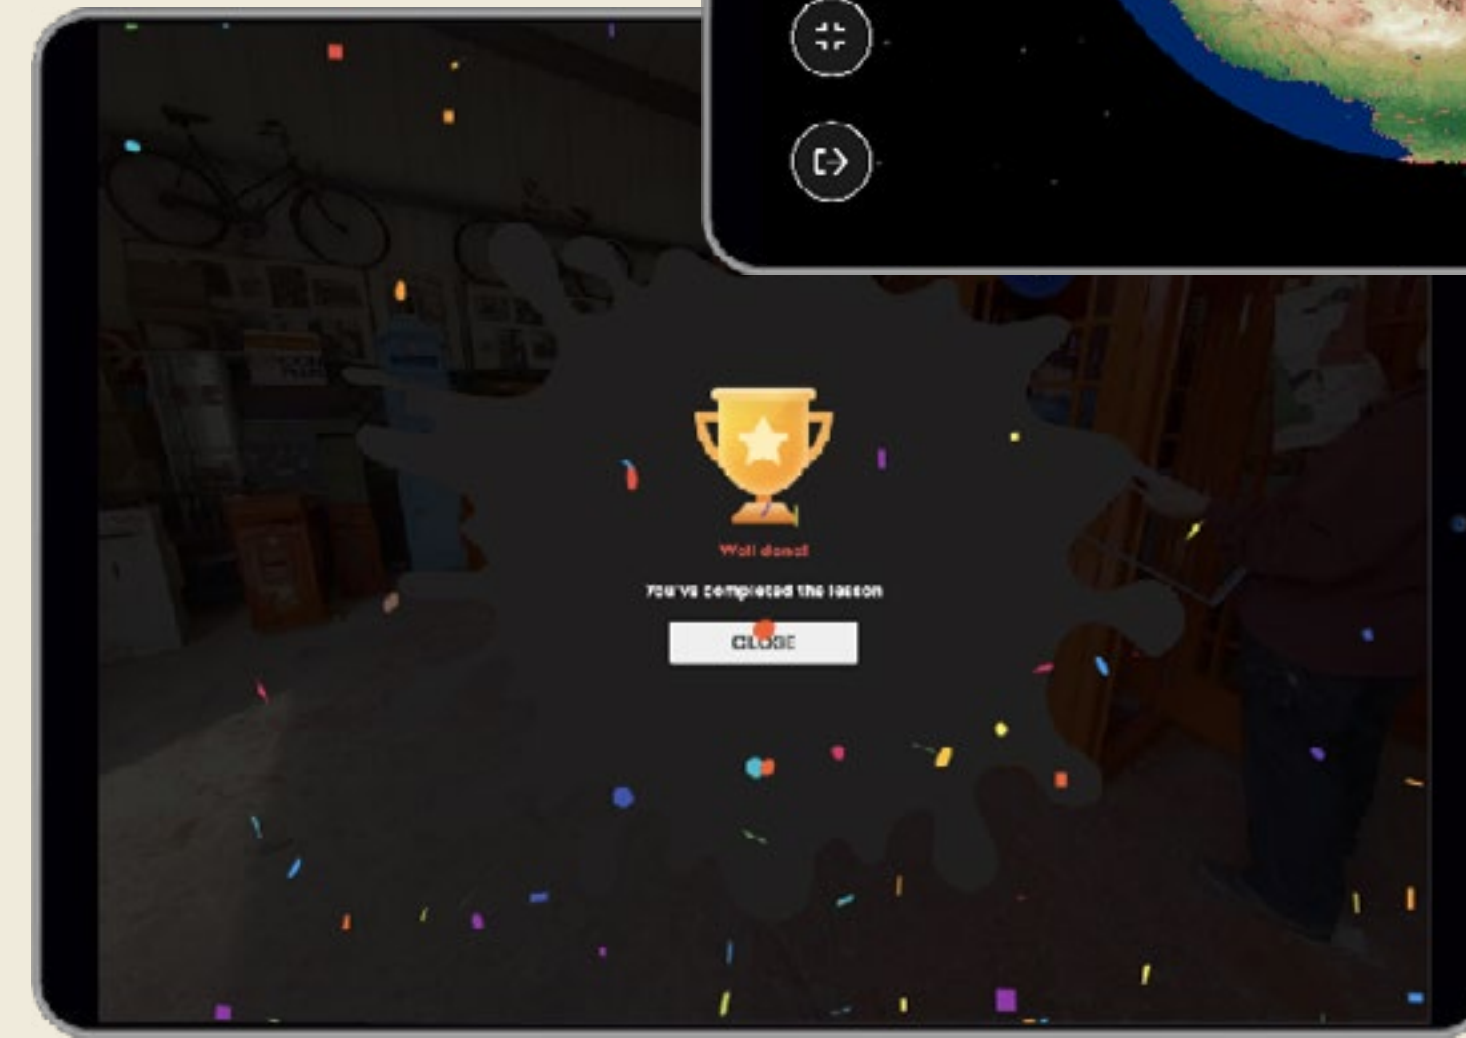

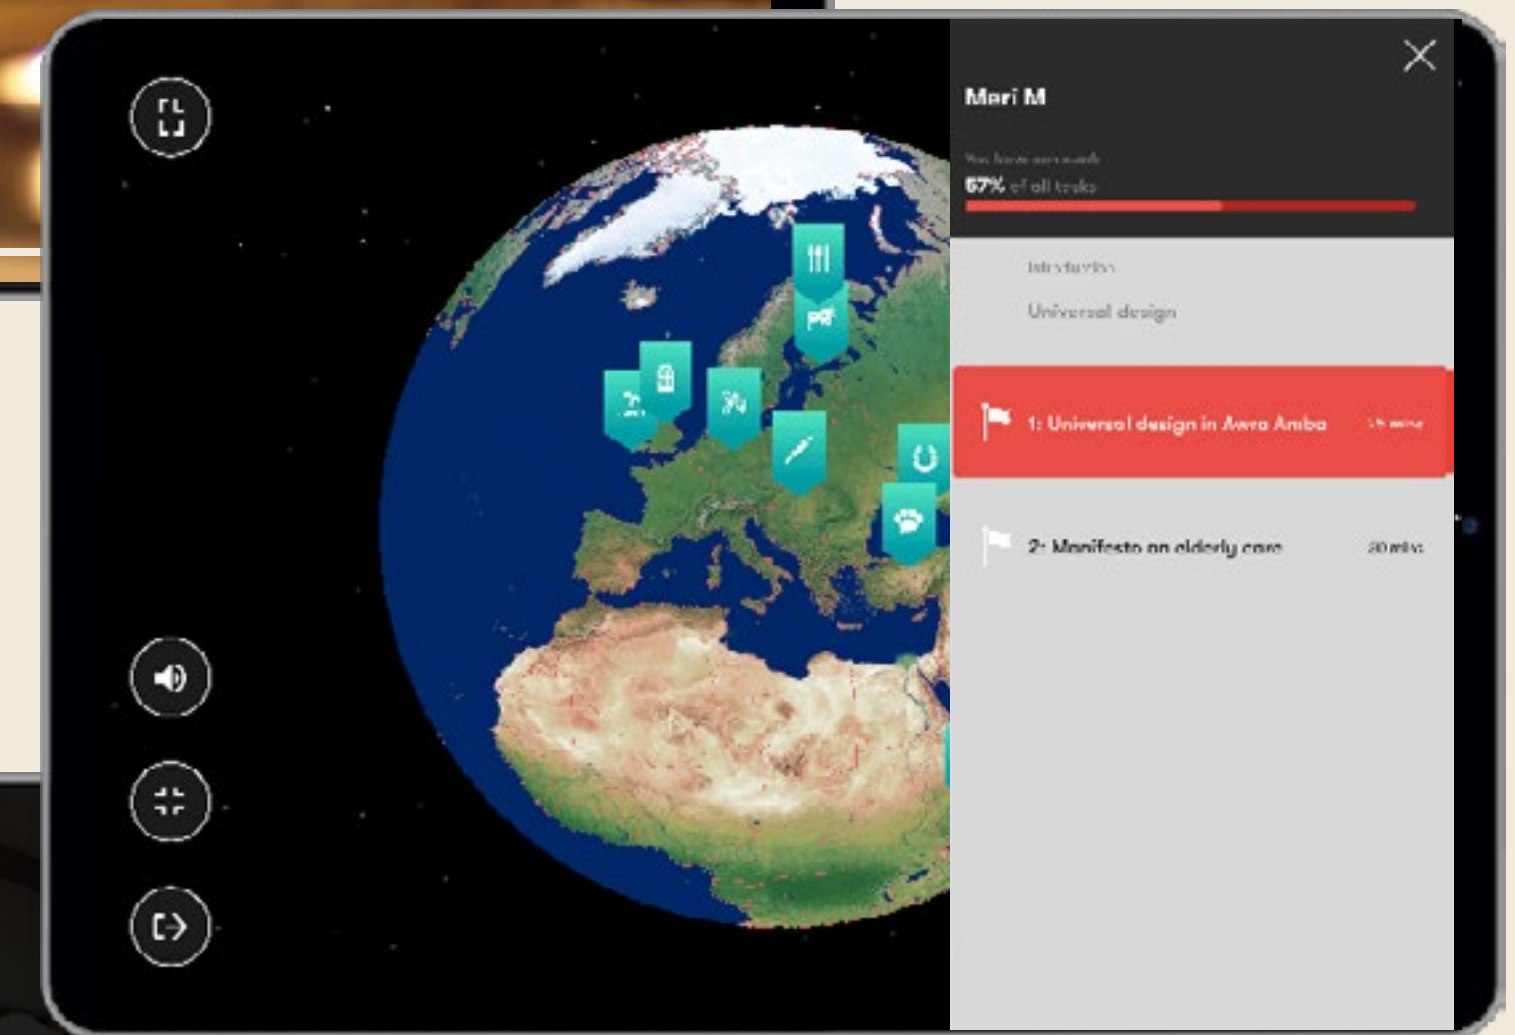

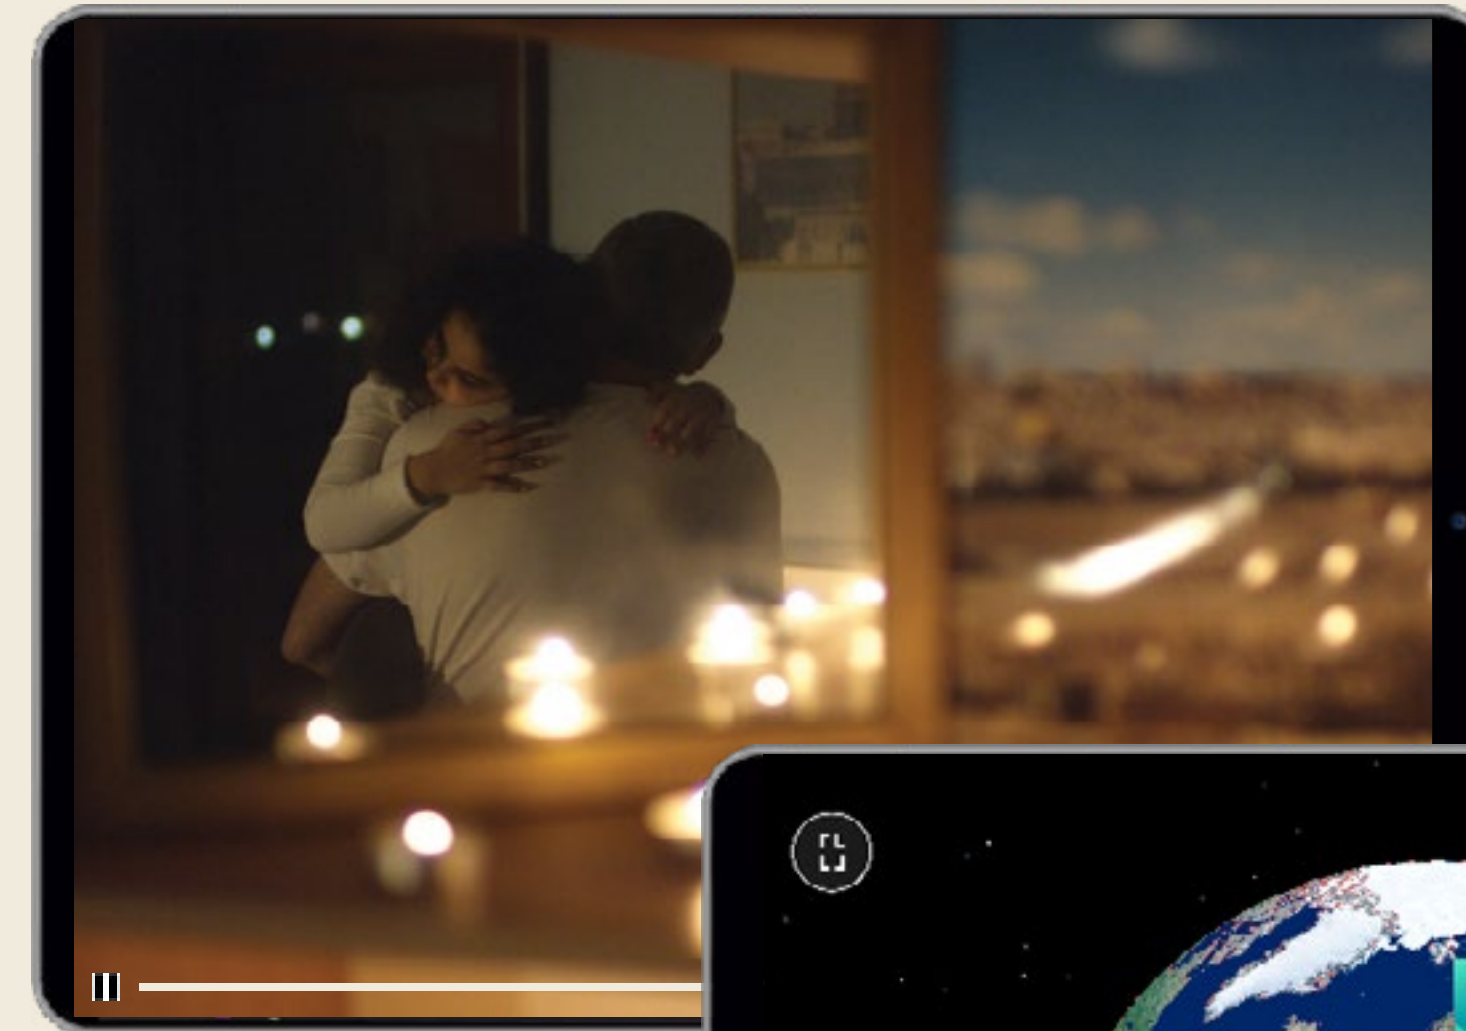

These plans can be used as they are, or adapted to fit a teacher's learning objectives. New lesson and assembly plans can also be built from scratch with the powerful lesson builder tool.

Student interface

The student interface supports a flexible range of delivery methods such as whole-class, face to face, blended, teacher-led, independent or remote learning. Teachers are able to guide learning through prompts and a set of interactive questions and challenges.

Students access their lessons easily from school or home using a laptop, PC or iPad and a simple passphrase generated by the teacher.

“

Lyfta is a powerful platform that reduces the marginalisation that children and young people with additional needs too often experience. The platform removes boundaries and has the unique quality of removing those labels of SEN or disability. Suddenly the world is there to access, explore, and engage with as a global citizen.

Vijita Patel, Swiss Cottage School

I am delighted with the quality of the resources. The content is engaging and invokes a never ending discussion around a variety of topics, including some which traditionally have been hard to broach at primary school.

Jon Carthy, Byron Primary School

I am amazed at the resources for teaching! It makes learning so real and current for our children.

Audrey Orpen, Venturers' Academy

Lyfta's vision

Our vision is that every child will have experienced and connected with a meaningful human story from every country in the world by the time they leave school - increasing their awareness and empathy of different people, cultures, languages, roles and perspectives.

They will have seen hundreds of positive human stories modelling resilience, problem-solving, teamwork, and many other critical skills, values and competencies. They will understand for themselves how interconnected and interdependent we are, and will have gained a deep awareness of their power and role in the world.
